Education

University of California, Los Angeles (UCLA) — Los Angeles, CA
Bachelor of Science in Computer Science and Engineering — *Expected Graduation Date: June 2030*

Granada Hills Charter High School — Granada Hills, CA
High School Diploma — 4.67 Weighted GPA, 4.00 Unweighted GPA — *August 2022 – May 2026*

Experience

CyberPatriots - Captain — August 2024 – May 2026
Granada Hills Charter High School — *Granada Hills, CA*

- Led 30+ students on a cybersecurity team to 7th nationally through weekly training and competition preparation
- Developed and taught networking/cybersecurity labs covering TCP/IP, VLANs, routing, and ACLs
- Built a Notion-based system to organize training resources and prepare 3 future team leaders

PROJECT: Creation - Co-President — August 2024 - May 2026
Granada Hills Charter High School — *Granada Hills, CA*

- Co-led weekly web development meetings for 20+ students covering HTML, CSS, JavaScript, Bootstrap, and React
- Designed hands-on lessons and interactive exercises to teach programming and web development concepts
- Grew club from 0 to 20+ active members through recruitment outreach and club fair engagement

VRMUN 2024 - Crisis Director — April 2023 – February 2024
Granada Hills Charter High School — *Granada Hills, CA*

- Authored a 40+ page background guide detailing character personas, powers, and roles
- Managed 4 committee chairs, coordinating contributions, setting deadlines, and resolving AI usage conflicts
- Oversaw committee flow and collaborated with 4 backroom staff to developer interactive crisis events

Projects

VoicemailGuard | *Python, PyTorch, Whisper, Swift/SwiftUI* — May 2026 - June 2026

- Developed a voicemail spam classifier automatically identify recurring loan-scam calls using Machine Learning
- Evaluated classification models like Logistic Regression and linear SVM for performance and speed across a dataset of 224 voicemail transcripts from personal and publicly sourced data
- Integrated OpenAI Whisper to transcribe voicemail audio and deployed the trained classifier locally with CoreML in a SwiftUI interface displaying predictions and suspicious-content indicators

Planner.io | *React, TypeScript, Tailwind, Firebase, Swift/SwiftUI* — June 2026 - Present

- Built a university-focused event planner with Firebase Authentication, Google Sign-In, and Firestore
- Developed a SwiftUI iOS companion with synchronized events, push notifications and personalized reminders
- Implemented AI-powered note organization to help users categorize daily reminders, thoughts, and personal notes
- Integrated an agentic AI scheduling assistant with Firebase AI Logic to manage events and find available timeslots

Quizlet.io | *React, TypeScript, Tailwind, Firebase AI Logic & App Check* — June 2026 - Present

- Built a full-stack study application to help students review course materials and prepare for exams
- Integrated Firebase AI Logic to generate flashcards and quizzes from text and PDF documents
- Developed an AI study assistant that answers questions and helps users understand course concepts

Technical Skills

Languages: Java, Python, C/C++, JavaScript, TypeScript, HTML/CSS, Swift
Frameworks: React, Node.js, SwiftUI, Tailwind CSS, Firebase, Firestore, Firebase AI Logic
Machine Learning: PyTorch, scikit-learn, pandas, NumPu
Developer Tools & Cybersecurity: Git, Github, VS Code, Linux, Cisco Packet Tracer
